NXTCART

PROJECT SHOWCASE
SMART SHOPPING CART

Smart shopping, with a live bill.

A cart that checks products and updates your bill while you shop.

THE OBJECTIVE

Make shopping easier and billing more reliable.

HOW IT WORKS

01 — Scan
Present the product's barcode or QR code.

02 — Add
Place the scanned item in the basket.

03 — Verify
Weight and camera check the product.

04 — View bill
See your items and running total.

KEY FEATURES

- ✓ **Live billing** — Item details, quantities and total.
- ✓ **Product verification** — Weight and visual checks work together.
- ✓ **Verified removals** — Confirmed removals update the bill.
- ✓ **Review before checkout** — Unresolved checks need attention.

EXPECTED OUTCOMES

- ✓ **Less checkout waiting** — Reduce repeated scanning at the counter.
- ✓ **Better budget control** — Know your spending as you shop.
- ✓ **Fewer billing discrepancies** — Spot mismatched or unscanned goods.
- ✓ **Focused staff assistance** — Review only the items needing help.

BUILT WITH

Barcode / QR scanning + Weight sensing + Camera vision + Touchscreen

Prototype project | Expected benefits to be validated in real shopping conditions.
